ABOUT

SUMMARY & RECOMMENDATIONS

About The Project

Retail Rescue

- Executive Business Analytics Case Study
- Transform historical e-commerce data into actionable business insights through interactive dashboards and strategic recommendations.
- Dataset
 - 99K Orders, 96K Customers . 3.1K Sellers . 71 Product Categories
- Technology
SQL SERVER, POWER BI , DAX

High Priority

- Launch targeted retention campaigns for Lost and Need Attention customers.
- Introduce a loyalty program for Champion and Loyal Customers.
- Increase investment in high-performing product categories.

Medium Priority

- Expand marketing efforts in underperforming states.
- Improve logistics in regions with higher delivery times.
- Diversify seller onboarding outside São Paulo.

Strategic Recommendations

Long-Term

- Develop personalized product recommendations.
- Improve marketplace seller analytics.
- Build customer lifetime value prediction models.
